## **AMIT KUMAR**

# Angular professional (with DevOps, cloud exposure) at GE Healthcare

# **Contact**

- +91 9619-144-566
- <u> amitgarg.cse@gmail.com</u>
- ∞ <a href="http://easycooking.co.in">http://easycooking.co.in</a>

# **Core Competencies**

- Requirement Analysis
- System design and development
- ✓ Data Structures & Algorithms
- ✓ Performant system designs
- ✓ Amazon web services
- ✓ End user focus from start
- ✓ Creativity and innovation
- ✓ Team spirited

# Profile Summary

- Software professional with 7 years of experience in software systems design and development across healthcare, finance and advertising domains at Amazon, GE Healthcare, Morgan Stanley and Adobe
- Proficient in Angular web development.
- ❖ Hands-on experience in Amazon web services, DevOps, NoSQL Databases
- Expert in Data structures, Performance optimized Algorithms

# Education

- M. Tech. (Software Engineering) from Delhi Technological University with 8.10/10 CGPA (till 3rd semester) in 2014
- ❖ B. Tech. (Computer Science & Engineering) from IIT Varanasi with 7.21/10 CGPA in 2009

# Academic Achievements

- Received "Innovation Award" in the Technex 2007, the Annual National Technical festival of IIT-Varanasi for prototyping "Digital Economy" project, which was an early prototype of Paytm concept.
- Scored 99.12 percentile in GATE 2012 & 99.19 percentile in GATE 2009
- Ranked 1702 among 2 lac students in IIT-JEE 2005

# Notable Accomplishments

- Received innovation sprint prize for Asset analysis tool POC from Amazon Advertising org in Nov'18. The POC aimed at increasing ad-compliance and ad-screening efficiency.
- Designed and led development of a very well appreciated Google Map integrated web application for Morgan Stanley Real Estate Investments (Similar to 99acres)
- ❖ Developed Feature **rich Angular 1 grid** for maintaining 1.5 million records at UI with 2 second response time for sorting, searching and paging.

# Skill Set

## **Web Technologies**

- HTML5, CSS3, Sass
- JavaScript (ES5, ES6) Typescript
- Angular, Angular-material, Angular-CLI
- Redux, yarn, npm
- Deployment: Docker, Kubernetes, Express.js, Nginx, AWS S3, CDN using Cloud Front
- Testing Automation: Karma, Jasmine, Selenium web driver
- Services: NestJS, MongoDB
- Object Oriented Design, Design Patterns

#### **Other Tools**

- ❖ Development: Intellij Idea Ultimate, Eclipse, Visual studio Code, VisualVM JMX
- ❖ Amazon web services: EC2, Dynamo DB, S3, Route 53
- Software Lifecycle: Git, Fork, GitHub, Jira, Confluence, Agile methodologies
- Continuous Integration: Jenkins, Circle CI
- \* Troubleshooting: Splunk, ELK Stack (Elastic search, Logstash, Kibana) stack, Chrome developer tools
- Platforms: Windows, Mac, Linux, Shell scripting

# Organizational Experience

### Sept'19 - Present

GE Healthcare, Bangalore, India as Senior software engineer

#### Role

- Innovate, Design and development, automation testing for generic ECG like components to be reused across GE healthcare websites.
- Development of <u>RemoteViewer</u> web app, to enable doctor to see patient's clinical parameters from his laptop, without visiting ICU.

#### Oct'18 - Aug'19

Amazon, Bangalore, India as SDE-2

#### Role

- \* Received best Innovation sprint POC prize for developing POC of Asset analysis tool for testing the incoming ad images against amazon ad policies.
- Contributed to Web and backend development of components and workflows of Amazon advertising web application.
- Spiked and implemented ELK (Elastic search, Logstash, Kibana) stack for Amazon managed advertising team for efficient discovery and analysis of application logs.
- Contributed to Selenium Test Suite development for our product.

## Aug'14 - Sep'18

Morgan Stanley, Mumbai as Senior Associate

#### Role

- Designed and led development of UI of Angular 5 web application capable of maintaining trade path reference data.
- ❖ Designed and led development of a Google Map integrated Angular 1 web app for Morgan Stanley Real estate investments visualization.
- Designing, writing and maintaining java API's and relational databases to support our web application features.
- Investigated and implemented continuous integration and delivery of web applications.
- Writing generic and reusable solutions, which were used across projects. E.g. writing a general purpose reflection based java library to turn a java iterable into an excel report with help of a configuration object.
- ❖ Participating in the **development and review of business** and system requirements to obtain a thorough understanding of business needs in order to deliver accurate solutions.
- sensuring high code quality through code reviews. Hiring and developing UI talent for our team.

# May'09 - Dec'09

## **Adobe Systems, Noida as Member of Technical Staff**

- Automated the mechanism to add peer review comments on violation of Adobe code policy against new perforce check-ins using code collaborator API. The tool enhanced error free, fast and reliable review against adobe code policies, which led to reduction of known security issues in Adobe products.
- Developed a Bugbot using Perl for listing unallocated bugs weekly and emailing those to project owners.
